
Purpose of the AGwiki server

General purpose

As at the normal Web Site, Carstens Medizinelektronik GmbH can provide information here for all EMA users. But there is an outstanding advantage concerning AGWiki - each user can easily provide his questions and information to other users and to Carstens Medizinelektronik. So we have an interactive platform anyone can profit by. ☺

In the same easy way as in Wikipedia, each user can edit all articles and create new ones.

So this Agwiki will become a useful forum by the knowledge and experience of all EMA users contributing actively to it!

Some examples for the content of the AGwiki

- news concerning soft and hardware
- scientific aspect of the Articulograph device usage
- finding standards for data recording (biteplane etc.)
- information on data treatment and evaluation programs
- finding standards for speech movement data evaluation
- Tips & Tricks of speech movement recording and evaluation
- Tips & Tricks for gluing – coating - sterilisation
- customer's suggestions to improve hard and software
- bug reports
- next conferences of interest

Some examples for the function of the AGwiki

organizing online conferences (skype)

discussion rooms

mailing lists

Personal pages to get familiar with all other EMA users

The purpose of AGwiki is to build a small and friendly community where all members will know each other. It would be nice if you could provide your personal information.

Functionally, the user page has an associated discussion page (click "my talk" on top) where your personal discussion can take place. With your "preferences" you can configure AGwiki to send you an e-mail if anyone changes the contents of your "talk" page.

Structure of the AGwiki server

The Main page offers two boxes: EMA and communication. This represents the separation into the device related part and the communication part.

The screenshot shows the AGwiki main page. At the top, there is a navigation bar with links like 'Bahne', 'my talk', 'preferences', etc. Below this is the 'Site map' section, which includes a 'Links on the Main Page' section. This section is divided into two main areas: 'EMA Page' and 'communication'. The 'EMA Page' section lists various articles and programs, including 'AG500 Manual List', 'warm up procedure', 'calibration program', 'Calibration quality', 'Compare calibration data', 'CalcPos - position calculation program', 'JustView - measurement display program', 'calibration and circl run analysis from user', 'AG200 evaluation programs', 'AG100 evaluation programs', 'Sensors', 'Sterilisation of the sensors', 'coating and gluing sensors', and 'TAPADM'. The 'communication' section is currently empty. There are also buttons for 'personal links' and 'links to "top" articles'.

The Site map shows a schematic of the Main Page's Links and a list of the top level pages

What you can do for the growing AGwiki community

The AGwiki is at any rate a forum where Carstens Medizinelektronik can provide information for their customers. But the more important factor is that the information flow can run *between* customers and to Carstens Medizinelektronik.

information, questions and answers

scientific or technical article

The best are those articles where some or all other EMA user are interested in. Here it is also possible to let an article grow over longer time by several authors.

For example, an article like "The best way to glue a sensor on the velum" may grow with the experience of several authors over longer time.

short information

Information like "I found a new perfect glue" is placed best at the news page with a link on the sensor page.

answer to a question at any board

Please review the discussion rooms if you see a question where you know the answer. There can be discussion rooms with EMA, administration/communication or AGwiki itself as subject.

question

Post your question to the right discussion room.

editors are welcome

Please feel free to correct typing errors or to improve articles. It is according to the WGwiki rules.

Notes at the edit window:

Please note that all contributions to AGwiki may be edited, altered, or removed by other contributors. If you don't want your writing to be edited mercilessly, then don't submit it here.

However it is possible to insert a link to a *.pdf file

You are also promising that you wrote this yourself, or copied it from a public domain or similar free resource (see Project:Copyrights for details).

DO NOT SUBMIT COPYRIGHTED WORK WITHOUT PERMISSION!

managers are welcome

If you like to improve the structure of the AGwiki page arrangement, please feel free. It is also fine if someone wants to take care of a subject area.

create a new discussion room!

establish a new category!

conduct other organisation issues that will increase the quality of this forum!
